Mack Defense Awarded \$725 Million CAD Contract to Supply More than 1,500 Trucks to the Canadian Armed Forces

ALLENTOWN, PA (July 16, 2015) – Mack Defense today announced that it has been awarded two contracts by the Department of Public Works and Government Services Canada on behalf of the Department of National Defense to deliver more than 1,500 8x8 trucks for the Medium Support Vehicle System (MSVS) Standard Military Pattern (SMP) program and to provide an initial five years of In-Service Support (ISS) for the SMP fleet operating in Canada and throughout the world.

Mack Defense (www.mackdefense.com) will also provide 300 trailers and 150 Armour Protection Systems as part of the two contracts valued at \$725 million CAD. Deliveries will begin in the summer of 2017 with completion in the fall of 2018.

“We are extremely proud that the Canadian government has chosen Mack Defense to provide the Canadian Armed Forces with our MSVS SMP solution,” said Ryan Werling, president of Mack Defense. “Mack has supplied the Canadian Armed Forces with trucks since World War II and we are honored to continue to support Canada’s domestic and international missions for years to come.”

The vehicle systems will include multiple variants such as cargo, material handling cranes, load handling systems (LHS), and mobile repair trucks (MRT). Mack Defense will work with key strategic Canadian partners including Volvo Group sister company PrevoSt; Dumur Industries Ltd; EODC, Inc.; and Link Suspensions of Canada (Raydan Division).

System assembly will take place in PrevoSt’s Sainte-Claire, Quebec, plant. The Volvo Group’s global supply chain, with a strong presence across Canada and in 42 other countries worldwide, serves as the foundation of the In-Service Support program.
